

SOLID CORE PARTICLEBOARD DOORS

SPECIFICATION

Particleboard doors are constructed with a solid timber perimeter frame and a particleboard core within two skins. These doors are suitable for internal applications, as well as external applications if a duracote hardboard skin is used. These doors are an ideal alternative to blockboard for high-end and high usage applications as they are robust, durable, solid on all four edges, and eliminate the issue of show-through of core material.

CORE MATERIAL

- + 45mm solid KDHW (ash) perimeter frame with particleboard core
- + 45mm solid pine perimeter frame with particleboard core

DOOR FACE OPTIONS

- + Paint quality plywood
- + Veneered plywood
- + Paint quality exterior grade plywood with "A" Bond glue line
- + Durocote hardboard

COMPOSITION

GUARANTEE

These doors are guaranteed against faulty workmanship and delamination subject to normal wear and tear but not damage from misuse. For further details refer to ALUFORM STANDARD TIMBER DOOR GUARANTEE.
